EXAMINER'S AMENDMENT

This application is in condition for allowance except for the presence of claims 21-25 directed to an invention non-elected without traverse. Accordingly, claims 21-25 have been cancelled.

The application has been amended as follows:

Cancel claims 21-25

Change title to ---METHOD FOR MANUFACTURING BRUSHES---

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claim 1 includes the limitation of a bundle of fibers loosely held in a holder with far end protruding from the holder and subjected to an end grinding process and free ends opposite the far ends resting loosely on the surface of an underlying support. The length of the far ends between the holder and the processing equipment used for end grinding is varied during the end grinding process.

Wehrauch (USPN 5176427) teaches fibers clamped together in a support (7) during an end grinding process (1). There is a holder element (10) that the fibers are loosely held within however the far ends of the fibers do not rest on this holder. Instead the fibers pass through this holder (10) so that the far ends can be clamped within the support (7).

Boucherie (USPN 5728408) teaches a means for processing the ends of fibers however fails to teach that the fibers are loosely resting on a support during the processing of the ends and that the length of the far ends between the holder and the processing equipment varies when processing the ends of the fibers.

Steinebrunner (DE4441985) teaches a method of end rounding fibers comprising a holder (11) for loosely holding fibers (5). The fibers are resting loosely a support (12) however the reference fails to teach that the length of the free ends of the fibers between the holder and the end rounder vary during the end rounding process. Instead, Steinbrunner teaches maintaining a constant length during the rounding process.

It would not have been obvious to one of ordinary skill in the art at the time the invention was made to modify Weihrauch, Boucherie or Steinbrunner to achieve the claimed invention since there is no motivation or teaching to do so. Therefore for the above reasons, the application is free from the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
